

## MILESTONE TURBOCAD DELUXE SHIPS

### Version 20 Highlights Price/Performance Leadership Through The Years

**SYDNEY, July 2013 – Mindscape** Asia Pacific, a leading Australian software publisher and distributor, and IMSI®/Design, the developer of the #1 best-selling CAD in retail, today announced the release of TurboCAD Deluxe 20.

"For over two decades TurboCAD Deluxe has set the price/performance bar in CAD," stated Bob Mayer, COO of IMSI/Design. "Version 20 continues this leadership role. Happy birthday, TurboCAD Deluxe!"

TurboCAD Deluxe v20 new and enhanced features including:

#### Superior Performance

- *New 64-Bit Version* – address up to 32GB of memory (compared to 2GB on the 32-bit platform). Load, process, and render much larger CAD files. (32-bit version still available if required by your hardware.)

#### Greater Usability

- *New Print Window* – enter coordinate values, or use the mouse to specify opposite corners of an area you wish to print. It's a simple way to quickly print just the part of a design you want.
- *New Super Selector Modes* – the drag mode selector has been greatly enhanced with three new drag modes and one new menu item that encapsulates the old selector modes offering more precise control over object selection for faster, easier modification of your drawing.
- *New Previous Selection Function* – allows users to quickly jump back to the last selection modified, and restore the selection.

#### Improved Interoperability

- *Improved AutoCAD 2013 (DWG) filter* – updated file filter offers a range of continued enhancements for working with the latest AutoCAD® and AutoCAD LT 2010 / 2011 / 2012 / 2013 files to maximise your workflow.
- *New STL filter* – now exports 3D models to STL file format, the format read by many 3D printer software programs for rapid prototyping.

## More Powerful Drafting & Detailing

- *New Protractor Tool* – place a virtual protractor on your drawing to more easily create construction lines in 2D and 3D. The Protractor Tool is able to work in many modes simultaneously with a powerful dynamic display.
- *New Stellated Polygon Tool* – create star-shaped polygon objects in two clicks. Just as quickly adjust properties including teeth number, stellated as wave (for rounded stellated polygons), radius external, radius internal, radius fillet external (works when stellated as wave option is ON), radius fillet internal, angle of rotation, hole diameter, and thickness (when working with ACIS 3D stellated polygons).
- *Improved Associated Viewport Dimensions* – add dimensions to an object through a viewport in paperspace and the dimensions will update if the model changes.
- *New Dimension Function* – linear and angular dimension tools now allow users to specify a fixed length for line extensions and the value for that length.
- *New Convert to Arcs Polyline* – convert a Bezier or Spline curve into a polyline composed entirely of circular arcs, or entirely of circular arcs and linear segments.

## Availability and Pricing

**TurboCAD Deluxe 20** is now available for \$149.95. Other versions available include **TurboCAD Pro 20** - SRP\$1,295 and **TurboCAD Pro Platinum 20** - SRP\$1,495. All products are available from selected retailers and all major resellers.
